SUMMARY

Data Science graduate with a strong foundation in Python, SQL, machine learning, statistical analysis, and data visualization. Experienced in data cleaning, preprocessing, exploratory data analysis (EDA), feature engineering, and predictive modeling to extract actionable insights. Skilled in building interactive Power BI dashboards and applying machine learning techniques for classification and prediction tasks, including a full-stack multi-disease prediction platform. Strong analytical thinking and problem-solving ability, with a passion for turning raw data into decisions that matter. Eager to continuously learn emerging technologies and collaborate on innovative AI and data-driven solutions.

EDUCATION

Government College University Faisalabad (GCUF), Pakistan <i>BS Data Science (BSDS) — First Division</i>	2022 – 2026
B.I.S.E Bannu Board <i>FSc Pre-Medical — Grade A+</i>	2018 – 2020
B.I.S.E Federal Board <i>Matriculation in Science — Grade A+</i>	2016 – 2018

SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), R (Plotly), SQL, MS Excel
BI & Visualization: Power BI; Data Visualization (Python, R, MS Excel, Power BI)
Machine Learning & AI: Machine Learning (Scikit-learn), Deep Learning (TensorFlow), Predictive Modeling
Statistics & Analytical Skills: Statistical Analysis, Analytical Thinking, Problem Solving
Professional Skills: Communication, Collaboration, Teamwork, Project Management

EXPERIENCE

Data Science Intern — SofticEra Institute & Software House, Faisalabad, Pakistan	03/2025 – 06/2025
- Cleaned, preprocessed, and analyzed real-world datasets using Python (Pandas, NumPy) to prepare data for modeling. - Built machine learning models for prediction and classification tasks, and evaluated model performance. - Designed Power BI visualizations and dashboards to support data-driven decision-making. - Performed SQL-based data extraction and supported database management tasks. - Collaborated with senior developers and analysts on team-based projects, gaining hands-on experience in reporting and documentation.	

PROJECTS

Pulse-AI — Full-Stack Web-Based AI Disease Detection System (Final Year Project), GCUF	01/2026 – 06/2026
- Developed a full-stack AI-powered healthcare platform that analyzes patient health data to provide early disease risk predictions. - Built and integrated four ML classification models: Heart Disease, Diabetes, Stroke Risk, and Liver Disease prediction.	
Lung Cancer Power BI Dashboard, GCUF	01/2024 – 05/2024
Developed an interactive Power BI dashboard to analyze lung cancer data, identify key patterns and trends, and present insights through dynamic visualizations.
